

Our company Busel is №1 PRODUCER of acid etched glass in Ukraine

We can produce one or two sides acid etched glass of the following sizes: 2250x3210mm, 2250x1605mm, 2550x1605mm; decorative acid etched glass 2250x1605mm.

Busel offers acid etched glass 4-10mm thickness on the basis of float (clear and extraclear) and tinted glass, mirror, painted glass Lacobel (AGC) and Planilaque (Saint-Gobain). We use chemical acid etching technology, therefore the surface of the sheet is given a homogeneous soft matte silky effect.

We make international transportation across all European countries by our own specialized trucks. In case we use European glass as raw material, we provide for our products EUR-1 Certificate.
